

Website Content Review & Improvement Recommendations

Considering the MIOGIMA HUB Company Profile and the current website write-ups

Website Reviewed	https://miogima.org/
Reference Document	MIOGIMA HUB Company Profile
Prepared For	MIOGIMA HUB
Purpose	To identify website content improvements that better reflect the company profile and support positioning for NGOs, development partners, government agencies, foundations, private sector organisations and international institutions.

Prepared as a working document for website copy improvement and content restructuring.

Contents

1. Executive Summary
2. Main Content Shift Required
3. Website Content Areas to Improve
4. Recommended Website Pages
5. Proposed Website Copy
6. Final Direction

1. Executive Summary

The current website should be strengthened to reflect MIOGIMA HUB's updated positioning as a professional consultancy and technical support firm. The existing website positioning appears to lean heavily towards SME and business support. While this remains useful, it is now too narrow for the broader company profile.

The company profile presents MIOGIMA HUB as a partner for programme management, implementation support, monitoring and evaluation, learning partnerships, technical assistance, institutional strengthening, WASH, climate resilience, TVET, livelihoods, humanitarian programming and enterprise development.

The website should therefore be updated to speak more directly to NGOs, development partners, government agencies, foundations, private sector organisations and international institutions.

2. Main Content Shift Required

Area	Recommendation
Current Website Direction	MIOGIMA supports small businesses, SMEs and enterprise development.
Recommended Direction	MIOGIMA HUB supports organisations, programmes, institutions and communities through consultancy, technical assistance, learning, implementation support and institutional strengthening.
Reason for Change	The new profile is broader, more professional and better suited for formal submissions, donor engagement, institutional partnerships and consultancy opportunities.

3. Website Content Areas to Improve

3.1 Homepage Positioning

The homepage should immediately communicate MIOGIMA HUB's broader consultancy and technical support role. It should not only position the organisation as an SME or enterprise support platform.

Suggested homepage headline:

Giving Life to Programmes, Partnerships and Institutional Impact

Suggested homepage sub-heading:

MIOGIMA HUB is a consultancy and technical support firm helping organisations design, manage, implement, strengthen and learn from development, humanitarian, public sector and enterprise-focused programmes.

3.2 About Us Page

The About Us page should explain the meaning of MIOGIMA, but quickly connect that meaning to the current professional positioning of the firm.

- Retain the “giving life” meaning of MIOGIMA.
- Explain that the firm brings structure, clarity, capacity and momentum to organisations and programmes.

- Mention that MIOGIMA HUB works across programme delivery, institutional strengthening, learning, technical advisory support and stakeholder coordination.
- Position the team as a lean core supported by a wider expert network.

3.3 Services Page

The website needs a strong “Our Services” page that reflects the full programme lifecycle. The services should be written in practical and client-friendly language.

Service Area	Website Copy Direction
Project and Programme Management	Workplanning, field coordination, budget tracking, risk management, partner follow-up and delivery oversight.
Programme Design and Implementation Support	Needs analysis, theory of change, logical frameworks, stakeholder mapping and adaptive management.
Monitoring, Evaluation, Accountability and Learning	Baseline, midline and endline studies, MEAL frameworks, indicator design and donor reporting support.
Learning Partner Services	Learning agendas, reflection sessions, field learning reviews, lesson documentation and adaptation support.
Research, Assessments and Knowledge Management	Needs assessments, feasibility studies, labour market reviews, policy reviews and knowledge products.
Technical Assistance and Specialist Advisory	Sector specialists in WASH, climate resilience, livelihoods, public health, education, governance, enterprise development, TVET and MEAL.
Capacity Building and Training	Practical training for staff, partners, government actors, community institutions, enterprises and youth groups.
Organisational Development and Systems Strengthening	Governance structures, policies, SOPs, finance and procurement systems, HR and accountability systems.
Communications, Documentation and Impact Storytelling	Success stories, case studies, annual reports, donor briefs, project profiles and visibility materials.

3.4 Sector Experience Page

The website should include a dedicated section showing where MIOGIMA HUB can work. This makes the firm more credible to donors, NGOs and government clients.

Sector	Recommended Description
Water, Sanitation and Hygiene	Assessments, feasibility studies, water supply planning, stakeholder coordination and programme monitoring.

Sector	Recommended Description
Climate Resilience and Environment	Adaptation planning, water catchments, water pans, check dams, soil and water conservation and climate-smart livelihoods.
TVET, Skills Development and Green Jobs	Skills needs assessments, TVET programme design, labour market reviews and training pathway analysis.
Livelihoods and Economic Development	Enterprise development, market linkages, value-chain strengthening, MSME support and financial inclusion.
Humanitarian and Development Programming	Emergency response, recovery programming, integrated interventions, accountability systems and adaptive learning.
Governance and Institutional Strengthening	Institutional capacity development, coordination, policy dialogue and organisational systems strengthening.
Youth, Gender and Social Inclusion	Inclusive programme design, youth engagement, gender-responsive implementation and community feedback systems.

3.5 Track Record / Technical Contributions

The website should include a careful, credible section on technical contributions. This should not overclaim completed projects, but should show areas of reference experience and technical capability.

Area	Relevant Contribution
Stakeholder Coordination	Stakeholder ecosystem mapping across government, business, donor, community and youth actors.
WASH and Water Supply	Water supply planning analysis for Baidoa, including water demand, boreholes, reservoirs, Isha Spring and dry-season supply constraints.
Climate Adaptation	Climate change activity mapping, including water catchments, pans, dams, check dams, shallow wells, soil bunds, fodder production and tree nurseries.
Green Jobs and TVET	Skills gap analysis covering plumbing, electrical work, solar installation, technical drawing and practical trades.
Humanitarian Learning	Learning and MEAL support materials for emergency-focused programming, including child and adolescent feedback and tool simplification.
Enterprise Development	Support concepts for MSMEs, farmer groups, business advisory, financial readiness and market linkages.

3.6 Why Work With Us

This section should appear prominently on the homepage and services page. It helps convert visitors into potential clients and partners.

- **Practical field understanding:** MIOGIMA HUB understands implementation realities and designs support that works in real contexts.
- **Multidisciplinary expertise:** The firm draws from a network of project managers, technical experts, MEAL professionals, researchers, trainers and facilitators.
- **Flexible delivery:** The firm can support short-term assignments, long-term partnerships and rapid technical support needs.
- **Strong coordination:** MIOGIMA HUB works effectively with government, NGOs, donors, communities, private sector actors and technical partners.
- **Results focus:** The firm prioritises clear outputs, measurable progress and practical recommendations.
- **Professional documentation:** The firm helps clients present their work clearly, credibly and in donor-friendly formats.
- **Contextual understanding:** The firm brings sensitivity to local systems, community dynamics and delivery constraints.

3.7 Approach / How We Work

The website should present the firm's approach as a simple, practical process.

Stage	Website Explanation
1. Understand the client's needs	Review objectives, context, stakeholders, constraints, risks and expected results.
2. Co-design practical solutions	Agree on realistic methodologies, workplans, deliverables, timelines and quality expectations.
3. Deploy the right expertise	Assemble the right mix of project managers, researchers, trainers, facilitators and technical specialists.
4. Manage delivery with discipline	Use clear workplans, coordination routines, documentation systems and risk management tools.
5. Generate evidence and learning	Collect and analyse information that helps clients understand progress, results and opportunities.
6. Support adaptation	Help clients use evidence and feedback to refine activities and strengthen outcomes.
7. Deliver clear outputs	Produce practical, well-written outputs for donors, partners, boards, government agencies and communities.

3.8 Contact / Call to Action

The contact page should do more than list contact details. It should invite partnerships, assignments and consultations.

Let's Give Life to Your Next Programme

Suggested call-to-action copy:

Are you looking for support with programme design, implementation, evaluation, technical assistance, learning, documentation or institutional strengthening? MIOGIMA HUB is ready to work with NGOs, development partners, government agencies, private sector organisations, foundations and international institutions to deliver practical and measurable results. Contact us to discuss your next assignment, partnership or programme support need.

4. Recommended Website Pages

Website Page	Improvement Needed
Home	Broaden positioning beyond SMEs and introduce consultancy, technical assistance and institutional support services.
About Us	Add the meaning of MIOGIMA and connect it to the new institutional support positioning.
Services	Create a clear professional services page covering the full programme lifecycle.
Sectors	Add WASH, climate resilience, TVET, livelihoods, humanitarian programming, governance and enterprise development.
Technical Contributions	Present previous work carefully as technical reference experience.
Why Work With Us	Add credibility, professionalism and partner value.
Contact	Add stronger partnership-focused call to action.

5. Proposed Website Copy

Homepage Intro

MIOGIMA HUB supports NGOs, development partners, government agencies, private sector organisations, foundations and international institutions with practical expertise in project management, programme implementation, monitoring and evaluation, learning partnerships, technical assistance, organisational development, capacity strengthening and stakeholder engagement.

About Us Intro

MIOGIMA HUB is a professional consultancy and institutional support firm established to help organisations deliver practical, accountable and measurable results. The name MIOGIMA comes from a Luo phrase meaning

“the act of giving life” — reflecting the firm’s purpose: bringing structure, clarity, capacity and momentum to organisations, programmes, institutions and communities.

We work at the intersection of programme delivery, institutional strengthening, learning, technical advisory support and stakeholder coordination. Our role is to help organisations move from ideas to implementation, from implementation to evidence, and from evidence to learning and adaptation.

Services Intro

MIOGIMA HUB offers practical consultancy and technical support services across the full programme lifecycle — from design and delivery to evidence generation, learning, reporting and institutional strengthening.

Sectors Intro

MIOGIMA HUB supports organisations working across development, humanitarian, institutional and enterprise-focused sectors. Our experience and technical network allow us to provide practical support in complex operating environments.

Technical Contributions Intro

The MIOGIMA HUB team brings practical technical reference experience across programme design, stakeholder coordination, WASH, climate resilience, skills development, humanitarian learning and institutional support.

6. Final Direction

The website should move away from a narrow SME-only identity and communicate MIOGIMA HUB as a professional consultancy, implementation support and learning partner. Enterprise development should remain part of the story, but not the whole story.

The strongest positioning is:

MIOGIMA HUB supports organisations, programmes, institutions and communities through consultancy, technical assistance, learning, implementation support and institutional strengthening.

This shift will make the website stronger for NGOs, donors, government agencies, private sector organisations, foundations and international institutions looking for practical, dependable and impact-driven consultancy support.
